			<p>dispute and the work is ongoing.</p> <p><b>9 February 2017:</b> The policy for the procedures and treatments that are procured and commissioned by IFR has been agreed and recently confirmed across the Sustainability and Transformation Plan (STP) footprint. The mechanical process has been agreed, however it was highlighted that there has been a dispute across the 6 CCGs in the STP in relation to the second part of the process. A further update will be provided as soon as it is available. The Governing Body was assured that this issue is not delaying the IFR process, which was confirmed to be working well. There was an in depth discussion around the second part of the process not working well meaning that patients are raising issues through complaint and MP letters instead of utilising the correct Appeals Panel process.</p>
