Executive Summary (Question, Options, Recommendations):
<p>Due to an unprecedented level of unavailable data for update of the Primary Care Dashboard and GP Practice Level Quality Monitoring Report it had been deemed unnecessary to submit this suite of documents for the February PCCC. Submission of the documentation would have resulted in members reviewing similar data as that presented at the December meeting.</p> <p>For information, the only new data available:</p> <p>Friends and Family Test – some levels of referral of F&F have dropped again and along with inconsistency data submissions from the practices. Action: Primary Care will continue to encourage Practice promotion of the Test.</p> <p>Flu vaccination data – is still being collected with increased numbers since the December meeting. Target coverage of 75% across all risk groups is within reach. However, numbers for vaccination in the 'under 65s at risk' and 'pregnant women not at risk' remain steady.</p> <p>Prescribing data was not available at time of report due to system collection issues – Business Intelligence colleagues are looking in to this.</p> <p>A Patient Online data update had not been made available due to an anomaly with POMI data - NHS Digital is looking in to this.</p> <p>Quality Issue Reporting Q3 is not available due to the time frame for reporting to Quality meeting.</p>
