## FINANCE MONITORING REPORT – FOR THE YEAR TO DATE TO MONTH 10 2017/18

### 1) INTRODUCTION

Attached at <u>Appendix 1</u> is a report which details the Year To Date (YTD) financial performance of all the Primary Care Budgets from April 2017 to January 2018 (i.e. Month 10 of 2017/18), along with details of a Forecast Out-turn.

The main assumptions which underpin these figures shown in Appendix 1, are summarised in the remainder of this report.

### 2) NHS ENGLAND AREAS OF EXPENDITURE

### A) Dispensing Doctors

- This data is 2 months in arrears and as such the accrual estimates for November & December are based on 2016/17 costs at current 2017/18 prices with a volume increase assumption based on national increases, but this spend is volatile by nature.
- Though the budget in the ledger is phased in 12ths, it is important to note that this expenditure is seasonal in nature. Therefore, from October there is a tariff reduction of 4.5% which has been factored into the position.

#### B) Enhanced Services & DSQS:

Accruals (i.e. for amounts of expenditure incurred but not physically paid) are made as follows:

- For: Minor Surgery / Violent Patients / Learning Disabilities the accruals are based on current expected sign up / spend expectation based on 2016/17 accounts plus a tariff increase for LD.
- For Extended Hours the accruals are based on Practice sign up. The practices that were expecting to sign up have done so.
- Unplanned Admissions This scheme ceased on 31 March 2017, however finalisation of 2016/17 payments is still ongoing.
- For the Dispensary Services Quality Scheme (DSQS) the accruals are based on expected 2017/18 Practice sign up, with precise numbers pending confirmation.

## C) APMS:

• The £14k YTD overspend for Market Hill relates to a List size adjustment.

#### D) GMS:

- Global Sum payments relate to the current YTD actual list sizes. Therefore, the circa £50.5k YTD underspend variance on GMS expenditure relates to the Global Sum List size adjustment.
- The Minimum Practice Income Guarantee (MPIG) is per the actual costs for current contracts.

#### E) PMS:

• The variance on PMS relates to List Size adjustment slippage, with an overspend value of value of circa £3k.

#### F) Other GP Services:

This includes the Contingency budget of £114,315 less a QIPP target of (£114,809).

#### **G) PCO Administered Expenditure includes:**

- Seniority payments (PMS & GMS) based on Q1 & Q2 and Q3 actual payments made and calculated by Capita. The Budget assumes a 25% reduction on 2016/17 levels per the national phasing out of this scheme, however this is dependent on Practice structure.
- Maternity, Sickness and Retainers costs are based on the actual claims submitted for the YTD.
- Overall PCO Administrated Budgets have a net YTD underspend of circa £8.4k.
- Please note there are several lines where the YTD spend exceeds the Forecast Out-turn, (e.g. The Doctors Retainers scheme for GMS and PMS Locum sickness), due to the way in which the forecast has been uploaded onto the system.

#### H) Indemnity Fees

These lines have been accrued to budget based on expected costs. Additional Funding
may be available for these fees from the NHS England Central Team, but this is still to be
confirmed at this stage.

#### I) Premises:

- Based on current expected costs, with rate accruals are based on the actual rate bills received in 2017/18 which have been verified.
- For Information: a budget virement to cover Clinical Waste costs has been transferred in Month 3 for £53,842 out of Contingency.

### <u>j) QOF:</u>

 The accrual for QOF achievement is based on the 2016/17 points and prevalence profile, restated at 2017/18 prices with a 0.7% demographic growth assumption. This has resulted in a YTD underspend of (circa £118k).

### 3) NL CCG AREAS OF EXPENDITURE

## A) Prescribing:

- Both the YTD Expenditure and Forecast Out-turn (FOT) figures are based on information received from the Prescribing Prescriptions Service (PPS) but augmented by accruals because the information received is at least 2 months in arrears.
- The YTD Expenditure and FOT is based on the following:
  - (i) The YTD value of prescriptions for the stated reporting period is taken, (i.e. The YTD spend at Period 8 for the Month 10 reporting period is used) and an accrual is added derived from the PPS Forecast Out-turn, for the 2 periods for which no data exists yet.

- (ii) The accrual for Months 9 and 10 is derived from the PPS FOT, by dividing the FOT by the annual number of prescribing days to obtain the average daily Prescribing Cost PA, which is then multiplied by the number of prescribing days in Periods 9 & 10, with this value then added to the supplied YTD figure for Month 8.
- (iii) The Forecast Out-turn currently being used is the PPS supplied value. Though other alternative methods (e.g. rolling averages etc) are also used to validate the PPS FOT, so that adjustments can be made if required if any anomalies are detected.
- (iv) Going forward, the FOT may need to be adjusted for the impact of any Quarter 4 savings received as a result of new initiatives (for example, as a result of a Prescribing Gain Share Scheme, which is currently being developed to work with the recent investment into the Optimise Rx system).
- (v) It is also important to note that the YTD expenditure includes £256k and the FOT £1.145k in respect of a Prescribing cost pressure in respect of "No Cheaper Stock Obtainable" (NCSO) price concessions, which are not available to the CCG to utilise as planned.

### B) Enhanced Services:

- The Enhanced Service YTD and FOT underspends result from the existing Enhanced Services contracts which are in place, and lower than expected use of the list size reserve which is currently shown as one combined figure on the Care of Older People LES budget line.
- Please note there is at least one line where there is minor YTD spend with no
  matching Out-turn due to the way the forecast has been updated on the system,
  which will marginally reduce the Forecast OT underspend for Enhanced services.

### 4) CONCLUSION & RECOMMENDATIONS

The committee are requested to:

• Note and receive the attached information.
